ICHARM Webinar FY2023

January 11, 2024

The International Centre for Water Hazard and Risk Management under the auspices of UNESCO (ICHARM), established as part of the Public Works Research Institute (PWRI), is the only UNESCO center in the world specializing in water-related disasters worldwide. ICHARM plans, implements, and supports a broad range of research, training, and information-networking projects to study water-related disasters and reduce their risks.

As an opportunity to share our unique global efforts, we will hold the ICHARM Webinar FY2023, mainly targeted at students and young researchers. We are looking forward to seeing many participants at this coming event.

Register here by January 5.

In case of a high volume of applications, we operate on a first-come, first-served basis.

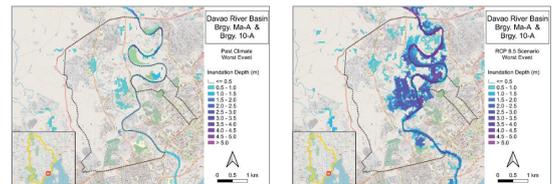

Webinar Agenda

Language: English

Plenary Session

14:00-15:00 (JST) (5:00-6:00 (UTC))
